

THE "OUT OF POVERTY" ALGORITHM

**KAMPALA/FACEBOOKLIVE
JANUARY 13TH 2021| 12PM EAT**

As we celebrate World Logic Day, Malaika Path, a Literacy organization will be presenting in an online webinar, on how an algorithmic approach, or logical approach to wealth creation can set one's mind on a path of personal financial wellness. Like algorithms, an instruction applied accurately to one's behavioral patterns can move one from point a to point x. Everything around us is embedded in some form of logic_ a set and series of equations leading to a certain outcome. Come and listen in on how logic can get you on a path to wellness.

**SPEAKER: REBEKAH KABUGO
MUGISHA**
